---

## Professional Summary

Software Engineer with 2 years of experience in backend development, cloud integration, and workflow automation. Skilled in Python, Go, and database management.

---

## Professional Experience

- **Backend Developer** — Innovatech — Jan 2021 – Present (2.0 years)
    - Built REST APIs in Python and Go for cloud-based applications.
    - Integrated PostgreSQL and Redis for data persistence and caching.
    - Containerized applications with Docker and deployed via Kubernetes.
    - Automated ETL pipelines using Airflow.
  - **Software Engineering Intern** — DataSolutions — Jun 2020 – Dec 2020 (0.5 years)
    - Assisted in building Python scripts for data processing.
    - Documented APIs and tested microservices.
- 

## Education

- BSc Software Engineering — Tech University — 2020
- 

## Skills

- Python, Go, Docker, Kubernetes, PostgreSQL, Redis, Airflow, REST APIs, Microservices, CI/CD
- 

## Projects

- **Cloud Workflow Automation:** Built Airflow pipelines to automate ETL jobs and trigger cloud functions.
- **Microservices Refactor:** Refactored monolithic backend into microservices deployed via Kubernetes.
